PROFESSIONAL SUMMARY

Principal DevOps Engineer and Architect with 12+ years of experience in CI/CD pipelines, cloud technologies, automation, build management Architectures for business. Currently at Zurich, leading kubernetes architecture for backend observability using Open Telemetry, building automation frameworks, and maintaining complex infrastructure. Proven expertise in designing scalable solutions to streamline operations, collaborating with cross-functional teams to enhance productivity, and managing and optimizing cloud environments. Committed to continuous improvement and innovation in DevOps practices.

PROFESSIONAL EXPERIENCE

Zurich Insurance

Feb 2026 – Present

Principal Architect

Dublin, Ireland

- ▶ Designing kubernetes architect for flexible observability framework using Open Telemetry for traces, metrics and log analysis.
- ▶ Driving infrastructure optimization initiatives to reduce operational costs and improve system without vendor lock-in helps in resource management.
- ▶ Implementing CI/CD workflow using Azure pipelines and GitHub Flow to improve release efficiency and engineering collaboration.
- ▶ Building a future-ready platform architecture focused on scalability, cost optimization and operational flexibility.

Informatica

Feb 2018 – Feb 2026

Principal DevOps Engineer

Dublin, Ireland

- ▶ Configured Kubernetes deployments integrated with Jenkins and Harness pipelines, reducing deployment time by approximately 50%.
- ▶ Automated release and deployment processes using Docker, AWS, and Jenkins for large-scale cloud and on-premises services.
- ▶ Built and maintained CI/CD pipelines supporting multiple concurrent product releases.
- ▶ Performed third-party upgrades without disrupting release cycles, ensuring secure software usage and compliance via Black Duck Code Center.
- ▶ Managed EBF post-release activities, source code merges, and release process improvements.
- ▶ Contributed to Docker framework upgrades and managed core Jenkins infrastructure.
- ▶ Mentored junior engineers and guided them on DevOps best practices, CI/CD pipelines, and Kubernetes adoption.
- ▶ Configured Nginx as a services with load balancer for other services like nexus enhancing application availability and reliability

AVR Edge Networks

May 2016 – Feb 2018

Software Engineer

Bengaluru, India

- ▶ Worked as an individual contributor automating client processes using Python and PHP.
- ▶ Designed new APIs and enhanced existing ones, improving performance and reducing operational costs.
- ▶ Implemented automation solutions that reduced manual intervention by 75%.

- ▶ Collaborated closely with clients to understand requirements and deliver high-quality solutions on schedule.

Cassius Technologies

Software Engineer

Jul 2014 – May 2016

Bengaluru, India

- ▶ Delivered projects for Freshers World using PHP (Yii framework) and Python (Django).
- ▶ Focused on feature enhancements, email automation, and invoice creation workflows.
- ▶ Led platform migration efforts to improve system performance and reliability.
- ▶ Implemented best practices for code quality and ensured seamless cross-platform integration.

TECHNICAL SKILLS

CI/CD & DevOps	Jenkins, Harness, Docker, Kubernetes, Ansible, Terraform (IaC), Azure pipelines, GitHub Actions
Cloud	AWS, Azure, Microservices, Containerization, K8s
Build Tools	ANT, Maven, Gradle
Version Control	GitHub, Perforce, Subversion, Git
Programming	Python, Shell Scripting, PHP, JavaScript, jQuery, HTML, CSS
Databases	MySQL, Oracle, MongoDB
Monitoring	Elasticsearch, Kibana, Logstash, Beats (ELK Stack), OpenTelemetry, Honeycomb
Artifact Management	Nexus, JFrog Artifactory
OS	Ubuntu, RHEL, SUSE Linux, UNIX, Windows, AIX, Solaris

EDUCATION

B.Tech – Computer Science

2010 – 2014

JNTU, Anantapur

CERTIFICATIONS

- ▶ AWS Certified Solutions Architect – Associate

AWARDS & RECOGNITION

- ▶ Above And Beyond Award – Outstanding performance (2019)
 - ▶ We Do Good Award – Solid contribution to Cumulative Patch Framework
 - ▶ Act As One Team Award – Mentoring and leading cloud / on-prem releases
 - ▶ Think Customer First Award – Extraordinary efforts on Zero-day Log4j vulnerability response
 - ▶ Aspire For Future Award – Innovated an automation framework to identify bugs during development
-
